Michael,

I reviewed your updated Allocation and Default Flow Schedule dated May 17. After consulting with available TAC members, I recommend that you implement the Default Flow Schedule and increase Interim Flow releases from Friant Dam to 450 cfs as soon as you are able. Thank you for your updated allocation/flow schedule. Please let me know if you need additional information or have questions.

Rod,

Please find attached the revised Allocation and Default flow schedule, effective May 17. This allocation is based on the Most Probable Forecast used by Reclamation's SCCAO Water Supply Program, which corresponds to about 755 TAF unimpaired runoff to Millerton Lake. Allocation for March 1 to May 28 is about 74,956 acre-feet. As of May 16, about 65,056 acre-feet will be released; you have about 9,900 acre-feet to schedule during the last two weeks of Spring flexible period. If you have any questions, please feel free to call or email.
