Additional information is available online at <http://www.restoresjr.com>. If special assistance is required at one of the scoping meetings, please contact Ms. Margaret Gidding via the phone number or e-mail listed above no less than five working days prior to the meetings.

SUPPLEMENTARY INFORMATION: Development of the PEIS/EIR for the Program is being carried out under Congressional authorization granted to the Secretary of the Interior under section 3406(c)(1) of the Central Valley Project Improvement Act (CVPIA) and will serve as the initial planning and environmental review activities necessary to implement the Settlement described below.

In 1992, Congress passed the CVPIA (Pub. L. 102-575, Title XXXIV) in order to protect, restore, and enhance fish, wildlife, and associated habitats in California's Central Valley. Specifically, CVPIA Section 3406(c)(1) requires the Secretary of the Interior to "[d]evelop a comprehensive plan, which is reasonable, prudent, and feasible, to address fish, wildlife, and habitat concerns on the San Joaquin River, including but not limited to the streamflow, channel, riparian habitat, and water quality improvements that would be needed to reestablish where necessary and to sustain naturally reproducing anadromous fisheries from Friant Dam to its confluence with the San Francisco Bay/Sacramento-San Joaquin Delta Estuary."

In 1988, a coalition of environmental groups, led by the Natural Resources Defense Council (NRDC), filed a lawsuit challenging the renewal of the long-term water service contracts between the

United States and the Central Valley Project, Friant Division contractors. After more than 18 years of litigation of this lawsuit, known as the *Natural Resources Defense Council et al., v. Rodgers, et al.*, a Settlement was reached. On September 13, 2006, the Settling Parties reached agreement on the terms and conditions of the Settlement which was subsequently approved by the Court on October 23, 2006. The "Settling Parties" include the NRDC, Friant Water Users Authority, and the Departments of the Interior and Commerce.

The Settlement is based on two parallel goals:

- To restore and maintain fish populations in "good condition" in the main stem of the San Joaquin River below Friant Dam to the confluence of the Merced River, including naturally reproducing and self-sustaining populations of salmon and other fish (Restoration Goal); and

- To reduce or avoid adverse water supply impacts to all of the Friant Division long-term contractors that may result from the Interim Flows and Restoration Flows provided for in the Settlement (Water Management Goal).

The Settlement states that the Secretary of the Interior will implement the terms and conditions of the Settlement. Additionally, the Settling Parties agreed that implementation of the Settlement will also require participation of the State of California (State). Therefore, concurrent with the execution of the Settlement, the Settling Parties entered into a Memorandum of Understanding (MOU) with the State (by and through the California Resources Agency, DWR, DFG, and the California Environmental Protection Agency) regarding the State's role in the implementation of the Settlement. The "implementing agencies", which include Reclamation, USFWS, NMFS, DWR, and DFG, are responsible for the management of the Program to implement the Settlement.

Public Scoping Meetings Scheduled for the San Joaquin River Restoration Program

The Bureau of Reclamation and the California Department of Water Resources (DWR) intend to prepare a Program Environmental Impact Statement/Environmental Impact Report (PEIS/EIR) for the San Joaquin River Restoration Program (SJRRP). A Notice of Intent to prepare the PEIS was published in the Federal Register on Thursday, August 2, 2007. The SJRRP is expected to be implemented by five agencies: Reclamation, U.S. Fish and Wildlife Service, the National Marine Fisheries Service, the California Department of Fish and Game, and DWR.

The SJRRP is the result of a Settlement reached in September 2006 by the U.S. Departments of the Interior and Commerce, the Natural Resources Defense Council, and the Friant Water Users Authority that ended an 18-year lawsuit. The Settlement is based on two goals: (1) to restore and maintain fish populations in “good condition” in the mainstem of the San Joaquin River below Friant Dam to the confluence of the Merced River, including naturally reproducing and self-sustaining populations of salmon and other fish; (2) to reduce or avoid adverse water supply impacts to all of the Friant Division long-term contractors that may result from the flows provided for in the Settlement.

Four public scoping meetings are being held to solicit public input on the scope of the PEIS/EIR, including resources to be evaluated, alternatives to be considered, and significant concerns and issues. The meetings will begin with a presentation on the purpose of the SJRRP followed by an open-house forum with several stations where participants can interact directly with Program team members.
